***FULL SCOOP**

†Primetime & Taco are only available in the Northwest Region

*Performance, California Complete & Pro-Pellet are only available in the Southwest Region

The best thing to have in your feed room is a scale. It is important that you weigh your feed so that you are providing enough to your horse to ensure they are getting all the nutrients they need.

That being said we have put together this table to give you a guide to start with.

If you would like help choosing a feed for your horse, contact your local LMF Feeds representative.
